Hossein Yazdani Pajouh
Senior C++ Software Engineer

PROFESSIONAL SUMMARY

Results-driven and analytical full-stack developer with 5+ years of experience in building scalable solutions across IoT, AR, and cloud-based services. Passionate about creating innovative and efficient digital products that drive business growth and digital transformation. Proven ability to lead technical teams, mentor junior developers, and deliver high-quality solutions in fast-paced environments. Seeking a Senior Software Engineer role at Ascent to leverage my technical expertise, problem-solving skills, and passion for innovation to deliver measurable customer impact.

PROFESSIONAL EXPERIENCE

Full Stack Developer
Cilbuper, Gothenburg
October 2021 - April 2025

- Designed and maintained scalable web services and applications for IoT and cloud-based systems using **ASP.NET Core**, **C#**, and **SQL**.
- Implemented backend solutions to support new IoT devices and customer management, improving system stability and control over user profiles.
- Integrated front-end interfaces using **HTML**, **CSS**, and **JavaScript**, enhancing user experience and implementing customer support forms via API.
- Worked in **Agile/Scrum** environments, participating in sprint planning, daily standups, and sprint reviews.
- **Key Achievement:** Streamlined data management processes, reducing system downtime and improving operational efficiency.

Android Software Developer
Cilbuper, Gothenburg

- Developed Android applications using **C++** and **Qt**, focusing on backend module implementation and front-end UI improvements.
- **Key Achievement:** Successfully implemented new backend modules and enhanced front-end interfaces, resulting in a better user experience.

VR Systems Developer
Ericsson, Gothenburg
June 2021 - August 2021

- Developed and tested VR solutions for industrial applications using **C++**, **Python**, **C#**, and **Unity**.
- Designed architectural solutions and interactive environments, contributing to further research in the field.
- **Key Achievement:** Optimized code execution to eliminate latency and maintain smooth frame rates in VR environments.

PROJECTS

Smart Home Automation (IoT Integration)

- Developed IoT solutions using **Microsoft Azure**, **C#**, **ASP.NET Core**, and **SQL**.
- Improved front-end interfaces and implemented secure API communication for customer support.
- **Key Achievement:** Enhanced system stability, customer support efficiency, and implemented secure authentication protocols.

Envision – Augmented Reality Application

- Led architecture, design, and development of an AR application using **Unity** and **C#**.
- Conducted research-based development, contributing to advancements in AR technology.

Virtual Workspace – VR Environment for Remote Work

- Designed and developed a VR-based workspace, integrating analog finger position signals for digital interactions.
- **Key Achievement:** Optimized code execution to eliminate delays, enabling seamless virtual interactions.

Thesis Project – VTI (Swedish National Road and Transport Research Institute)

- Developed a VR system generating avatars based on user movements detected by VR wearables.
- **Key Achievement:** Successfully created avatars with behavior mapping based on user movements.

TECHNICAL SKILLS

- **Programming Languages:** C#, C++, Python, Java, JavaScript, HTML, CSS

- **Frameworks & Platforms:** .NET Core, .NET Framework, ASP.NET MVC, React, Unity, OpenXR
- **Databases:** SQL, Entity Framework
- **Cloud Platforms:** Microsoft Azure
- **DevOps & CI/CD:** Azure DevOps, Git
- **Methodologies:** Agile, Scrum, Kanban, DevOps

EDUCATION

Bachelor of Science in Computer Engineering
University West, Trollhättan
September 2018 - June 2021

LANGUAGES

- **Swedish:** Fluent
- **English:** Fluent
- **Persian:** Native
